LGTM but I left a question

core/src/main/java/org/elasticsearch/common/settings/Settings.java

```
...    @@ -718,6 +718,14 @@ public Builder setSecureSettings(SecureSettings secureSettings)
718    718                if (secureSettings.isLoaded() == false) {
719    719                throw new IllegalStateException("Secure settings must already be loa
720    720            }
721    +            if (secureSettings.getSettingNames().isEmpty()) {
722    +                // TODO: fix this leniency!!!
```
